Summary

Highly driven, senior software engineer with 6 years of professional experience building and maintaining large-scale Laravel applications for enterprise clients. Actively developing a live production side project with 1,500+ global users as a solo dev.

Professional Experience

Retail Insights LLC · Senior Solutions Engineer

March 2022 – Present

- Develops and maintains large-scale pharmaceutical procurement platforms serving thousands of users for Fortune 10 clients, developing features across pricing, competitive bidding, compliance, analytics and supply chain workflows.
- Leads client-facing meetings, scopes project requirements, and gives product demos to stakeholders.
- Contributes to cross-platform internal Composer packages for authentication, forms, field components, and workflows.
- Works within a team of 8 engineers in an agile environment, triaging production issues alongside program management and QA to ship fixes on tight timelines.

Delivery Circle · Software Engineer

June 2020 – February 2022

- Contributed to a last-mile logistics SaaS platform serving automotive and hardware delivery operations nationwide.
- Developed driver payout dashboards, delivery report tools and onboarding / profile management features.
- Collaborated with a team of 5–8 engineers shipping features in a fast-paced agile cycle.

Technical Skills

Core: PHP, Laravel, Livewire, Filament, Laravel Blade, MySQL, PestPHP, PHPUnit

Frontend: HTML, CSS, SASS, TailwindCSS, Bootstrap, JavaScript, jQuery, Alpine.js, Vue.js, Node.js, Vite

Infrastructure: AWS Cloud, Ubuntu Linux, Laravel Forge, Composer, Git, GitHub, Docker

Practices: TDD, REST APIs, Database Migrations, MVC, Pair Programming, Agentic Development, Claude Code, Technical Writing

Additional: Python, Postman, Bitbucket, VS Code, Bugsnag, Laravel Nightwatch

Education

Rowan University · B.S. in Computer Science

Projects

Song Rank · songrank.dev

A Spotify integrated Laravel application with over 1,500 users around the globe. Song Rank allows users to create ranked lists of artists' discographies using a merge-sort pairwise comparison algorithm with interactive social features that encourages discovery and sharing. Built and maintained as a solo developer end-to-end — from Spotify OAuth integration and extended API quota approval — to infrastructure, security, and deployment via Laravel Forge.

Laraword · laraword.dev

A Wordle-inspired vocabulary game built for the PHP and Laravel developer community, featuring daily challenges, freeplay modes, and a curated library of framework-specific terminology. Built with Livewire and Filament.

Community

Regular attendee of PHP×Philly & PHP×NYC. Engaged in the Laravel community, attended Laracon US 2024, 2025.
